CD-ROM Patent Images by Technology

The U.S. Patent and Trademark Office announces the implementation of a demonstration project to provide classified sets of patent images in CD-ROM format. The classified sets are collections of U.S. patents which, by virtue of their placement in the U.S. Patent Classification System, represent meaningful technological groupings.

The two classified sets selected for this project are: Genetic Engineering, as defined by Class 935 and Class 435, subclass 172.3; and Acid Rain, as defined by Class 55, subclass 73 and Class 423, subclasses 220-234 and 242-244.

The sets will contain:

1) current classification information
2) full images for all patents in the set, and
3) full text for those patents in the set where the text is available in electronic format, i.e., since 1971

All available text and classification information will be indexed and searchable, thus allowing all patents in the set to be retrieved by their associated classification information, and/or by words in the text. Images of all patents in the set will be stored in numeric sequence on the discs and may be located on a disc other than the disc where the text and indexes are stored. Images may be retrieved by patent number after loading the appropriate image disc.

It is anticipated that the demonstration CD-ROM sets will be available July 1992. Each set will consist of approximately three discs. They are available for order now by the public for $150 per set. This price represents the marginal cost to the U.S. Patent and Trademark Office to produce and distribute these discs based upon the volume of orders anticipated.

Purchasers will be invited to participate in a voluntary survey to be conducted in October 1992 to assess the usefulness of this demonstration product.

Trademark Drawing Requirements Trademark Rule 2.52, 37 C.F.R. §2.52

For an application to satisfy the filing date requirement under Trademark Rule 2.21(a)(3), 37 C.F.R. §2.21(a)(3), it must include a drawing of the mark substantially meeting all the requirements of Trademark Rule 2.52, 37 C.F.R. §2.52. Because the granting of a filing date to an application potentially establishes a date of constructive use of the mark, timely public notification of the filing of applications is important. Marks must be accurately and expeditiously entered into the automated search system and filed in the Trademark Search Library.

The purpose of this notice is to identify recurring problems which have resulted in the loss of filing dates for failure to comply with Rule 2.21(a)(3).

Color in the Mark

Rule 2.52(a) requires that every line and letter in a drawing, including color lining and lines used for shading, must be black. Color in a mark can be shown only by using the linings depicted in the color chart in Rule 2.52(e). This requirement is strictly enforced. The Office denies filing dates to applications where color appears on the drawing.

Drawing Size

The requirement of Rule 2.52(c) that the mark on a drawing be limited in size to 4 inches wide by 4 inches high continues to be strictly enforced. *In re Fuller-Jeffrey Broadcasting Corp. of Santa Rosa*, 16 USPQ2d 1456 (Comm'r Pats. 1990). See *Official Gazette Notice* at 1102 TMOG 6.

Two Drawings Submitted With One Application

A single application may seek registration of only one mark. Therefore, as a matter of policy, the Office denies a filing date to any application which is accompanied by two drawing, each displaying a different mark.

Heading

Rule 2.52(d) requires that the drawing include a heading which lists the applicant's name and address, the goods and services, the dates of first use of the mark for an application based on use in commerce under 15 U.S.C. §1051(a), and the priority filing date for an application based upon a foreign application under 15 U.S.C §1126(d). If the heading is ommitted in its entirety, a filing date is denied to the application. *See In re Hackmack*, 16 USPQ2d 1895 (Comm'r Pats. 1990).

Two Page Drawings in Trademark Applications

The Office denies a filing date to any application in which the mark does not appear on the first page of the drawing.

Rule 2.52(d) requires that the drawing include a heading which lists, among other things, the goods and services for which registration is sought; and Rule 2.52(c) requires that there be a margin of at least one inch on the sides and bottom of the paper, and at least one inch between the mark and the heading.

Implicit in Rule 2.52 is a requirement that the mark and heading appear on a single page, in all but the most exceptional circumstances. There is an administrative need for a filing system that utilizes single page drawings, to expedite filing of mark drawings in the Trademark Search Library and entry of accurate information into the automated database. More importantly, there is a risk that the individual pages from multi-page drawings might become detached and separated in the Index of Pending Applications.

Historically, the Office has permitted the filing of drawings in which the heading continues onto a second page only where the goods and services covered by the application are so numerous that they cannot be listed within the heading margins on a single page. *Trademark Manual of Examining Procedure §807.02.*

Although the Office prefers that the identification of goods or services in such cases be abbreviated so that the entire drawing will fit onto one page, the Office will continue to accept drawings on which the list of goods or services continues onto a second page, in appropriate circumstances.

If the goods and services are abbreviated in the drawing heading, as recommened here, this will in no way limit the goods and services covered by the application. For purposes of determining the goods and services covered by an application, the written application is always controlling. *See In re Tokiwa Mfg. Co. Ltd.*, 21 USPQ2d 1395 (Comm'r Pats. 1991).

If an applicant deems it to be necessary, the heading of a drawing may be continued onto a second page. However, in all cases, the mark and a portion of the heading must appear on the first sheet. The Office denies a filing date to any application which fails to display the mark, in accordance with the size and margin requirements of Rule 2.52(c), on the first page of the drawing. This requirement is strictly enforced.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particluar library is urged to contact that library in advance about its collections, services and hours in order to avert possible inconvience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
